

#### **12.04 ON-LINE WATER QUALITY MONITORING:**

In critical areas of the Integrated Water System, Denver Water will require on-line monitors capable of transmitting data regarding pH, specific conductance, chlorine residual and turbidity. The sites may include reservoirs, pump stations or other appropriate locations. Denver Water will be responsible for the ownership, operation and maintenance of the monitors. Data will be telemetered to Denver Water's Load Control Operations Center, compiled and made available through the Internet. Internet data will be updated every 24 hours.
